## EXPERIENCE

### SENIOR FRONT-END ENGINEER

UMR Labs - 2023 - Present

#### PROJECTS

##### WEBACCESS

- Utilized Next.js and Tailwind CSS to create a visually appealing website with a focus on reusable components and responsive design.
- Implemented and integrated RESTful APIs developed by the back-end team using Laravel.
- Implemented Next-Auth for secure user authentication.
- Developed WebAccess plugin using vanilla JavaScript to ensure seamless compatibility with any website implementing WebAccess.

##### PINTOE

- Achieved pixel-perfect design by collaborating with the UI team to ensure consistency and usability.
- Used Next.js and Tailwind CSS to design user interfaces, ensuring they were responsive, intuitive, and user-friendly.
- Integrated WebRTC for real-time audio/video calling and online streaming capabilities, enhancing communication features for users.
- Implemented WebSocket for live chat, enabling real-time data updates and communication between users.
- Integrated PayPal for processing payments and purchasing premium plans, ensuring a secure and efficient transaction process.
- Engaged in code reviews, refactoring, and implementation to ensure code quality and maintainability.

##### SENTINEL EP

- Planned and implemented the website design and architecture from scratch using Vue.js and Tailwind CSS.
- Integrated Vue.js with Laravel Blade architecture to enhance dynamic components and facilitate smoother backend logic integration.
- We developed a robust admin area for managing Website data.

##### GUAYLLAS MAGIC CLEANING

- Led the front-end team to ensure smooth and efficient development processes.
- Collaborated with the front-end team on code reviews, bug fixes, and deployment to ensure high-quality deliverables.

# EXPERIENCE

---

## SOFTWARE ENGINEER

*iQuantile* - 2022 - 2023

### PROJECTS

#### *QUANTIBLY*

- Led the project lifecycle from planning to execution, using Vue.js to build the application from scratch, ensuring robust functionality and a smooth user experience.
- Mentored junior team members to help enhance their skills, providing guidance, feedback, and support to foster their professional growth and development.
- Worked with the backend team to integrate and optimize Django RESTful APIs for seamless data flow and functionality.

## SOFTWARE DEVELOPER

*Joules Labs* - 2018 - 2022

### PROJECTS

#### *CROWDFUNDLY*

- Leveraged Nuxt.js and Bootstrap SCSS to design a visually appealing website with an integrated admin panel, emphasizing reusable components and a responsive layout.
- Worked closely with the UI team to align on design specs, user experience goals, and visual integration.
- Teamed up with the WordPress Plugin team to integrate and refine plugins, boosting functionality and ensuring full compatibility with the website.
- Collaborated with the backend team to integrate and optimize Laravel RESTful APIs.

## WEB DEVELOPER

*Kodeeo* - 2017 - 2018

- Contributed as a team player to the development of the company's branding website.
- Collaborated with the backend team (PHP, Laravel) to gain insights and knowledge in backend development.
- Worked on testing and bug fixing to ensure a stable and reliable application.

# OTHER PROJECTS

---

## AI OR NOT

- Designed and implemented APIs with React, Tailwind CSS as a collaborative team player.
- Integrated PayPal for processing payments and purchasing premium plans.
- Worked on testing and bug fixing to ensure a stable and reliable application.

## FLOATPIC

- Collaborated on fixing bugs and implementing new features using React.

## ENEOS DRYICE SYSTEM

- Worked on fixing bugs and implementing new features, as well as conducting QA testing, using Next.js, Tailwind CSS, and GraphQL.

## KEENO

- Designed the entire website with HTML and CSS, and converted it into Laravel Blade architecture.
